Comfort and protection tough enough for a US Marine

1000 denier nylon,
highly breathable,
abrasion resistant
side panels.

Vibram® Outsole

Speed laces

Waterproof,
breathable
GORE-TEX®
barrier

MARINE CORPS TEMPERATE WEATHER BOOT WITH GORE-TEX® FABRIC

Marine Corps Temperate Weather Boots made with GORE-TEX® fabric are more than tough enough to measure up to U.S. Marine Corps standards.

At the core of the boot is a GORE-TEX® lining that completely surrounds the foot to form a barrier that water can't penetrate. The lining also resists contaminants like petroleum, oils, and lubricants. Shoe polish, silicone, oil, and leather conditioners don't affect the waterproofness of the boot.

Perspiration inside the boot is managed with the help of the GORE-TEX® lining that breathes to prevent overheating and excessive moisture build up inside the boot.

The upper is leather and textile for fast break-in. The Vibram® outsole gives the aggressive edge a Marine's job demands, and a cushioned insole absorbs shock.

For more than 30 years, W. L. Gore & Associates, Inc. has developed high-performance fabrics that withstand the harsh environments military, law enforcement, fire and rescue professionals encounter on their missions. Gore combines research in the fundamental science of fluoropolymers with a thorough understanding of the challenges these professionals face to engineer durable protective fabrics. After extensive laboratory testing and field trials, Gore stands behind these fabrics, ensuring that each product does what we say it will do.

PERFORMANCE ENHANCING DESIGN FEATURES

- Durably Waterproof & Breathable
- Highly breathable upper combines fabric and leather for shorter break-in time vs typical all leather boots.
- Long-wearing wicking lining wicks perspiration, dries quickly, and resists odor and mildew.
- Enhanced lacing system with speed-lace eyelets.
- Shock absorbing cushioned insole.
- Non-marking outsole resists contamination by jet fuel and oil.
