

GORE® PARALLON™

LINER SYSTEM

Using proprietary barrier technologies in a unique layering configuration, the GORE® PARALLON™ liner system physically replaces the moisture barrier and thermal liner in conventional gear. It achieves unparalleled levels of breathability, while also preventing serious drops in thermal protection that can occur as your gear gets wet, particularly from sweat. Traditional turnout gear usually has a tradeoff between thermal protection and breathability, because increasing one typically means giving up some aspect of the other.
